I. INFORMATION PACKAGE

PERDIDO LANDFILL ONSITE LEACHATE TREATMENT OPTIONS Solicitation Identification Number PD 18-19.094

The Escambia County Waste Services Department (ECWSD) located at 13009 Beulah Road, Cantonment, Florida requests proposals from qualified consultants to perform an initial feasibility study, permitting, construction-level engineering design, bid support, and engineering assistance during construction for the Perdido Landfill Leachate Treatment System. This is expected to be a multi-phased project with sequential tasks to be negotiated as the ECWSD makes decisions on future approaches to leachate treatment. Phase 1 of this project is the Feasibility Study (Study) and is the primary focus under this request for proposal.

Project Background:

The Perdido landfill occupies 424 acres and has accepted Class I and III waste since 1981. From 1981 through 1989, Class I waste was disposed in 45 acres of unlined landfill cells using the trench and fill disposal method. Subsequently, lined cells were constructed in Sections 1, 2A, 2B, 3A, 3C and 4, and the nearly completed Section 5, 1A which are contiguous to an unlined landfill area. The Perdido Landfill (Facility WACS ID 1688) is governed by FDEP Permit No. 0000667-21-SC and includes a closed Class I Landfill, an active Class I Landfill, A Class III Landfill, a recycling facility, a yard trash processing facility, a waste tire collection center, a citizens drop-off center, a landfill gas flare, and a landfill gas recovery facility. The Perdido Landfill generates approximately 20 million gallons of leachate annually. The leachate is collected and temporarily stored and pre-treated on site in two HDPE lined 3.5-million-gallon leachate basins. Pretreatment activities consist of extended retention time and aeration prior to discharging to ECUA. ECUA treats the wastewater at the Bayou Marcus Wastewater Treatment Plant (WWTP).

The ECWSD has been discharging landfill leachate to the Emerald Coast Utilities Authority (ECUA) since 1996 in accordance with an Interlocal Agreement for Leachate Treatment and Disposal (Agreement). Prior to 1996, the ECWSD treated leachate exclusively onsite through a 26-acre artificial wetland system that ultimately discharged into a set of rapid infiltration basins.

For the past 10 years, the ECWSD has been paying the ECUA between \$200,000-\$300,00 annually for leachate treatment with continuously increasing fees. The treatment fees associated with nitrogen alone have risen to \$100,000 per year on average over the past 5 years. These rising costs, in addition to uncertainty in the ECUA's continued willingness/ability to accept the Perdido Landfill leachate have led the County to seek additional pre-treatment measures and on-site treatment options.

PD 18-19.094, PERDIDO LANDFILL ONSITE LEACHATE TREATMENT OPTIONS

In reference to nitrogen, Paragraph 6 of the ECUA/County Agreement stipulates that, “the County shall use reasonable and practicable efforts to provide pretreatment as may be necessary to assure that the concentration levels of pollutants contained in the Leachate delivered to ECUA shall not be higher than 40 milligrams per liter.” Total nitrogen concentrations in the Perdido Landfill leachate continue to average 500 mg/L, indicating that the current pre-treatment approach has not been effective in reducing nitrogen levels below the Agreement limit of 40 mg/L.

Scope of Work:

The primary objective of this project will be to evaluate potential methods ranging from enhanced pre-treatment techniques to full scale on-site treatment technologies. An example may be implementation of a nitrogen pre-treatment system consisting of modifications to the existing leachate basin collection system to lower nitrogen concentrations below the threshold of 40 mg/L. This could be considered a “hybrid” system where enhanced pre-treatment would enable the ECWSD to continue to use the ECUA WWTP as a final treatment option. The Feasibility Study should include a comprehensive investigation of all pre-treatment options and on-site treatment strategies.

In 2015, the ECWSD contracted with both the University of Florida Department of Environmental Engineering Sciences (UF) and the Hinkley Center for Solid and Hazardous Waste Management (Hinkley Center) to evaluate the feasibility of on-site leachate treatment methods at the Perdido Landfill. The Consultant will be provided these reports which evaluated various approaches including air-stripping, Sequential Batch Reactors (SBR), Reverse Osmosis (RO), and wetland treatment.

In preparing the Feasibility Study, the Consultant should review the UF and Hinkley Center reports (2015) in addition to performing their own comprehensive evaluation. In addition, historical leachate data will be provided by the ECWSD but it is encouraged that the Consultant perform their own analysis of leachate characteristics. The Consultant should demonstrate extensive experience designing the type of leachate treatment systems that are presented in the Study. Furthermore, the technologies and methods proposed in the Study should be those that are successfully practiced at other landfill facilities. The Consultant should prepare a comprehensive comparison of these technologies including schedule, budgetary estimates for design, permitting, construction and operation/maintenance of the various options.

The Consultant will then present the Feasibility Study to the ECWSD with recommendations for the most suitable approach(es). The ECWSD will evaluate the recommended options and then may consider requesting the Consultant to prepare a proposal for the next phase (Phase 2) of this project, which depending on the technology may include design, permitting, and construction-related activities. Although it is anticipated that the Consultant would commence with work under Phase 2, subsequent work is not guaranteed.

PD 18-19.094, PERDIDO LANDFILL ONSITE LEACHATE TREATMENT OPTIONS

Under this Agreement, the ECWSD will budget funds during Fiscal Year(s) 18-19 for Phase 1 of this Project and allowing for negotiations to be held at a later date for the remainder of the proposed fee for Leachate Treatment Permitting, Bid Assistance & Construction Assistance when the project can be better defined.
